End-to-end Business Value
On Your S/4HANA Journey

Reduce or Eliminate Technical Debt
 Move to the Cloud
Enable Business Agility
 Reduce IT Costs
Explore New Business Models
 Provide Flexible Staffing and Resource Options

We have the experience, skills, and capabilities to help you on your S/4HANA journey. Whether it is an ECC to S4 migration, ECC to S4 Greenfield, new deployment, full-stack development, or supplemental staff we can help you get there better, faster, and cheaper.

- SAP License Optimization and IT Spend Management**
 Whether you are renewing your licenses, updating your applications, transitioning from ECC to S/4HANA license, handling "Digital Access," or working on services agreements, we've been doing this for many years.
- Technical Debt Reduction Architecture, Roadmaps, and Future State Business Solutions**
 Reduce technical debt to simplify, standardize, and modernize your technology portfolio. We help simplify the future with where to invest, maintain, and retire SAP and non-SAP applications to optimize your portfolio for the digital enterprise.
- New SAP Deployments or SAP ECC to S/4HANA Brownfield and Greenfield Upgrades**
 We have S/4HANA migration and deployment experience. With our **Rapid Prototyping and Modeling (RPMSM)** Approach, we quickly identify opportunities to reduce technical debt, reduce cost, and improve SAP fit.
- Staff Augmentation, Run Support, and Application Managed Services**
 We deliver offshore, onshore, and near shore capabilities at highly competitive rates. Our application management and staff augmentation allows us to provide fractional, project-based, or long-term support options.
- Guiding Your Internal Innovation Execution Capabilities Far Beyond Idea Generation**
 Inside today's entertaining "innovation centers" there is weak execution or development of your mid and long-term innovation capability. We teach you how to develop and then execute on innovation now and for the future.
